*Del Mar, CA (February 15, 2015)* “In recent years, top-tiered physicists have made ground-breaking discoveries leading to an expanding theory that all living matter exists in one, vast, quantum field of sub-atomic vibrations in the space between matter, the akasha, a virtual, invisible web of life energy force, where everything is connected.”

*Akashic Alphabet* is a collection of intuitive visions received from the akashic records, housed within the space of the collective mind, the cosmic container of all that is and ever has been. Wisdom from within this resonating, energetic heart, whose fabric connects all humanity, life-forms and unlimited elements, is accessible to all, through meditation.”

From the moment we are born, our minds and spirits are inundated with dark news of terrorism, toxins, disease, unethical practices and more. This often conditions us to view life through a perspective of fear and dread. What if instead, we were filled with learning of a positive nature, focused on love, beauty, joy, the truth of our life purpose? Author, Trenace Rose believes “It is of vital importance for protection of the collective mind, that people are opened to another, remarkable side of life taking place, where all is viewed through a looking glass of Light.” She suggests “Tremendous value and power, with inherent goodness can be found in this awareness, as it offers the ability to counter-balance and transcend in exponential proportion, the lower energies here on the planet.”

An artistic, one-of-a-kind, Spiritual-Inspirational Gift book, *Akashic Alphabet* offers a thought-provoking series of vision narratives coupled with acutely sensitive, fine art illustrations painted by a Master Artist, whose art resides in museums. Portrayed through an astral lens of Light, the vignettes reveal a graceful connection of Oneness found in diverse cultural and spiritual philosophies around the world.
